

Research Center for Transforming Health

Making Research Possible

The **R**esearch **C**enter for **T**ransforming **H**ealth

Mission:

To **support investigators and their teams** as they move from concept to fulfillment, making transformative and innovative research possible.

Vision:

To create a **culture of possibility** to accelerate translational research and foster collaborations

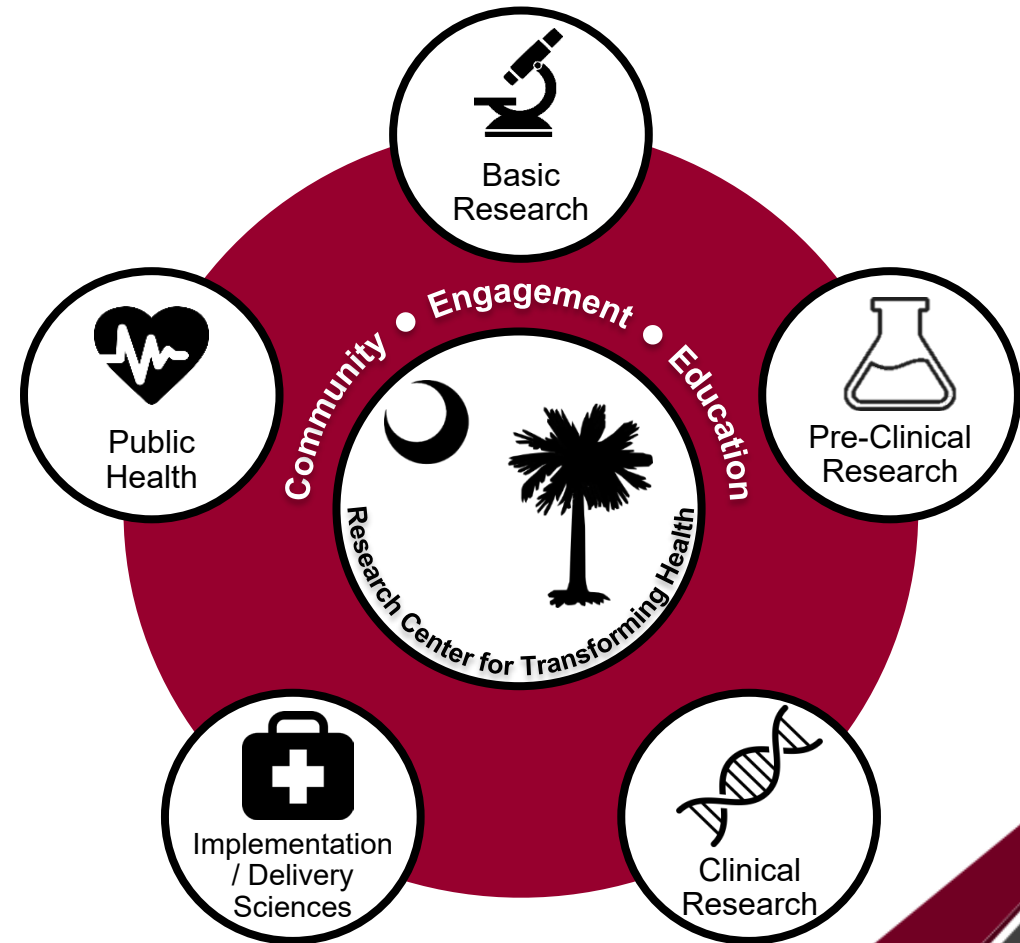

The **R**esearch **C**enter for **T**ransforming **H**ealth

- The RCTH team has extensive experience in supporting investigators and their teams to support research efforts.
- This includes:
 - Research Development & Support
 - Pipeline Programs
 - Mentorship & Training
 - Biostatistical Support

Supporting the **full continuum** of healthcare-related research

- Basic Science
- Pre-Clinical
- Clinical
- Implementation / Delivery Sciences
- Public / Population health

Research Support- Development

Project Development

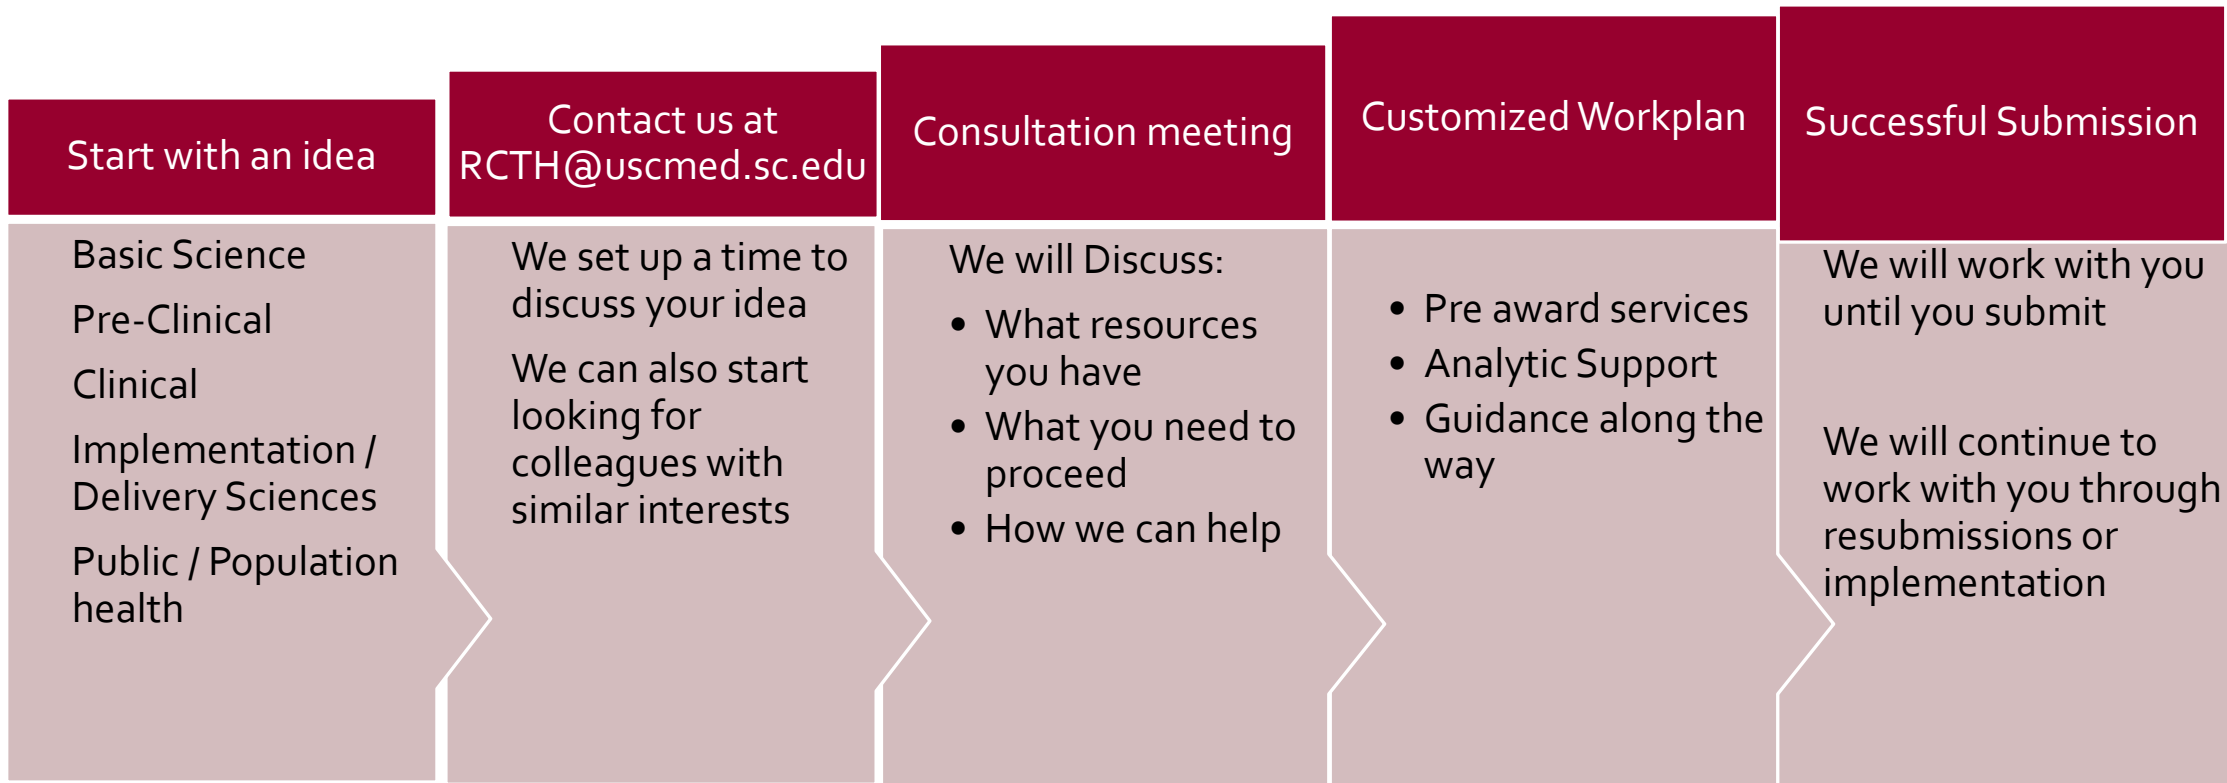

- Research project planning
- Operationalizing hypotheses and research questions
- Experimental/study design
- Biostatistics & data management consultation
- Facilitating Interdisciplinary & Cross-Institutional Collaborations

Grant Proposal Development

- Identifying funding sources
- Submission consultation & support
- Submission document review
- Grant Proposal Peer Review

Grant Submission Support- How it works!

Research Support-Post Award/Project Implementation*

Project Support

- Project Management
- Data Management
- Research Coordination
- Grant Administration

Analytic Support

- Data analysis & interpretation
- GIS

Program Evaluation

- Formative and summative evaluation
- Needs assessments
- Process evaluation or monitoring studies
- Outcomes evaluation

** These services may have associated costs.*

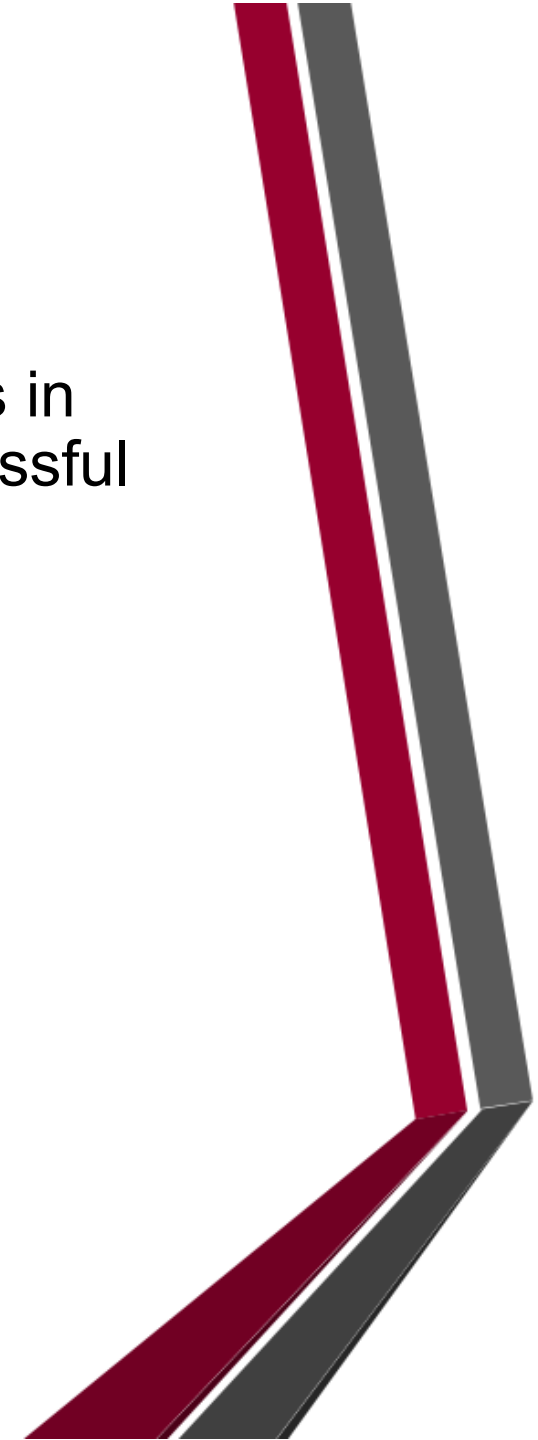

Grant Peer Review

- The RCTH Peer Grant Review Program is a valuable resource for investigators to obtain useful pre-submission feedback of their proposals.
 - USC SOM faculty/faculty affiliates and Columbia VA investigators are eligible to submit their research proposal for pre-submission review.
 - Investigators will receive feedback from experienced researchers.
 - Submit items for peer review online via the [RCTH Peer Review request form](#).

Emerging Physician Scientist Faculty Program (EPS)

- Mentorship and support for new physician faculty investigators in translational research to foster career development and successful extramural grant submissions.
 - Gain experience & mentorship in translational research
 - Provide education and training
 - Pilot project funding
 - Supporting research across the translational spectrum
 - Promoting interdisciplinary projects
 - Supporting research to reduce health disparities

Transformative Research Seed Grant Initiative

- The purpose of the Transformative Research Seed Grant Initiative is to facilitate collaborative research activities between the University of South Carolina faculty and Clinical Partners.
 - Projects may be funded up to \$20,000, and applicants can request a project period of 15 months.
 - Awardees must propose a research project that will serve as support for an extramural research grant application, and recipients are expected to disseminate their work locally, regionally, and/or nationally.

RCTH Mentorship & Training

- Fostering Mentor/Mentee Connections
- Networking & Identifying Collaborative Partners
- Research Education (training, seminars, symposiums)
